

The honest study you have done in cosmology increases my faith in Him. --R.D., CA

A most excellent book. -- P.S., CA

You have broken a lot of new ground in this book and taken on the Einsteins, which had to be done from the theological aspect. D.L., NY

I have already read a few sections of the book and am enjoying its richness.-- D.C., OH

I am finding it difficult to express sufficiently my gratitude for the second edition of *Geocentricity* ... But this I do: thank you so very much, my dear brother in our Lord Jesus Christ, for all that you have been enabled to do to bring this about. -- T.S., UK

A few weeks ago I finished your book. WONDERFUL! -- C.L., NC

I hope that you will reach as many as possible with your work. -- R.G., AL

Congratulations on a job well done! Would that more scientists would honor their creator without compromise. -- M.S., TX

What a wonderful treatise on the subject, in defense of the Book of Books and a repudiation of the popular science falsely so called. I'm giving one copy to my pastor and my wife wants to read mine. N.S., KY

It comes through clearly that the author is a confident and unwavering Bible believer. P.R., OH

An endorsement of the author:

Some years ago, Dr. Bouw, as a service to me, was abstracting articles in various scientific journals, and I was utterly amazed at this man's brilliance and his ability to grasp the article that he was abstracting and reading. It made no difference whether it was astronomy or biology or geology, or whatever it was, it was amazing, the breadth of Gerry's knowledge and ability to grasp the subject.

--Dr. Duane Gish
